PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student with expected graduation in 2027 and independent experience shaping retail and business operations applications. Translate business ideas into product requirements, feature priorities and connected user journeys. Focus on interface clarity, operational handoffs and iterative product refinement.

CORE SKILLS

Product planning: Problem framing, requirements definition, feature prioritisation, scope planning, product documentation

Workflows and experience: User journeys, workflow mapping, interface review, information hierarchy, clear action labels

Product development: AI-assisted prototyping, functional review, iterative refinement, case-study writing

INDEPENDENT PROJECTS

NEXORA AI OS

Retail desktop application

- Defined product scope and user journeys for a local retail workspace connecting customer records, inventory, sales, invoices and financial reporting.
- Refined requirements for transaction states, stock movement and payment records, with clear dashboard labels and links between business records.

AI Operations Platform

Business operations application

- Shaped an enquiry-to-action workspace linking leads, conversations and follow-ups with controlled internal workflows.
- Mapped policy outcomes and human-review points, organising interface content around visible decision states, operational handoffs and recorded execution history.

Personal Portfolio

Professional website and desktop presentation

- Organised three independent projects into concise introductions, contribution statements and detailed case studies; refined navigation labels and content hierarchy across the portfolio.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Rayat Bahra University, Mohali | Expected 2027

12th PCM

LANGUAGES

Punjabi, Hindi and English
